

Comparative Genomics Vacation Summer Scholar Award

James Cook University's Comparative Genomics Centre is now offering Research Studentships for undergraduate students who are enrolled at any Australian University to undertake hands-on genetics research over summer in Townsville

Applications are now open to apply for the Comparative Genomics Centre Summer Vacation Student Award. Successful applicants receive instruction in the latest genetic, genomic, molecular biological and immunological techniques, receiving a prize of \$350 per week for a full-time commitment of 6 weeks over the 2011-2012 summer break.

This Studentships will give the successful applicants a rewarding and unique experience of working in one of the ten world class laboratories with cutting-edge technical facilities in the CGC in a broad range of topics ranging from immunogenetics, biotechnology, to aquaculture genetics .

Talented and highly motivated students with excellent academic records who are currently enrolled in an appropriate undergraduate degree program are encouraged to apply.

Details on how to apply can be found at
